RollupOps: an agent-run business brokerage

- Fully automated brokerage for small and medium manufacturing and distribution businesses
- Built for the Terac Zero-Human Company Hackathon, NYC, Oct 24 2026
- impactquadrant.info

THE PROBLEM

Main Street M&A still runs on phone calls

- Owners of machine shops and industrial distributors have no affordable, confidential way to test the market
- Buyers spend months hunting off-market deals one cold call at a time
- Traditional brokers are slow, manual and costly for sub-scale deals

THE COMPANY

A brokerage with nobody on payroll

- Agents do the broker's whole job: find buyers, source sellers, qualify both sides, match, run the deal room and checkout
- Focus: precision machining and industrial distribution. No mining
- Valuation estimates as ranges (SDE under $2M, EBITDA from $2M), never an asking price

TWO-SIDED AGENTS

Buy side and sell side, in parallel

- Buyer agent: keeps buy mandates fresh from public signals plus live Exa search
- Seller agent: sources, checks and dedupes sellers; blind teasers with PII lint
- Matcher scores buyer-seller fits; Whop agent creates checkouts
- Orchestrator: python -m rollupops.orchestrator --exa

REVENUE: WHOP CHECKOUT

9 live products on Whop

- PE Deal Flow $499/mo · Off-Market Deal Drop $49/mo · Deal Teardown $149
- Sell-side Retainer $1,500 · Business Valuation Report $499
- Sale-Readiness Audit $999 · Buyer Landscape Report $299
- Confidential Teaser + CIM $1,500 · Quality-of-Earnings Lite $2,500
- Paid order → intake → agent draft → owner approval → delivery

HUMAN TRUST LAYER

Terac verifies the business owner

- Only one human-in-the-loop step: blue-collar business owner verification
- Consented identity-and-intent call; redacted notes reviewed by one US Terac reviewer
- Reviewer is paid only after we approve the work
- PE buyers are vetted personally by the founder, never sent to automated review
- Signed PE buyer partners (under NDA)

COMPLIANCE BY DESIGN

GREEN jurisdictions only

- 24 US states + DC: AL CT DC DE IA IN KS MA MD MO MS MT NC ND NJ NM OK PA SC TN TX VA VT WV
- Plus Brazil, Switzerland, Germany, Spain, Japan, Mexico
- Everyone else: "Not available in your location yet"
- We never hold funds and do not store SSNs

ARCHITECTURE

How it fits together

- Python agents (rollupops/) + DuckDB marketplace backend
- Exa search · Whop MCP/API checkout + webhooks · Terac MCP/API review
- Vercel dashboard + API (webhook, intake, approve) · Wix storefront
- Outreach and marketing drafts are never auto-sent: owner approves

LIVE NOW

See it running

- Storefront: www.impactquadrant.info/services
- Dashboard: dashboard-six-fawn-83.vercel.app
- Code: github.com/Cubiczan/rollupops

NEXT STEPS

From launch to first close

- First paying customers through the 9 Whop products
- First Terac owner verification study
- Finish the Wix marketplace, NDA gate and valuation calculator
- Expand outreach with owner-approved marketing across LinkedIn, Facebook, Instagram, TikTok
